

As your pharmacist, I want to know how I can best meet your health care needs.

You can help by telling me what's important to you about your medicines and your health. For example:

- Medicines with the fewest side effects
- The impact of your medicines on your daily activities
- Keeping the daily doses to a minimum
- Special formulations (like liquid or chewable medicine)
- Cost-saving opportunities

I would be grateful for your help so that I can provide you with the medications and information you need.
