

Dollars & Sense Save money with online drug cards

3.1

Need help paying for your prescriptions? You may be eligible for discount cards that can be printed online.

- Ask your pharmacist to recommend a program for you.
- Once you have chosen a program, go online to access your discount card. You will probably need to provide some basic information such as your state, county and email address.
- After you have provided the required information, simply print the card and bring it with you to the pharmacy next time you fill your prescription.

These discount programs are not insurance. Refer to the exclusions in your insurance documents to see if a specific discount can be used with your plan.
